Motion carried with 6 votes

**David Hannah
Wade Boone**

Financials:

Motion to Approve January:
Financials as Presented:

Nancy Pruitt

Motion Seconded:
Motion carried with 6 votes

Al Wise

Presentations:

Pipe Bursting – Presented by Frankie Glover : Pipe bursting machine was bought 5 years ago and has a 100 year life cycle. Frankie goes over a presentation that Erik; his assistance put together and shows us what pipe bursting is, how its done, and the jobs after when they clean up meaning putting down sod, fixing gates, and concrete driveways. We have saved about \$6,454,067.83 in just 5 years by pipe bursting in house. If we outsourced it would be \$388 ft and in house its about \$61.93 ft. Pipe bursting is to remove old clay & concrete pipe that was put in years ago to replace it with polyethylene. Frankie also discuss that they also do manhole rehabs because the city has grown a lot and the bigger manholes can hold a lot more.

Public Comments: None

Old Business: None

New Business: Public Works : Leak Communication Policy Discussion

Projects: **South Plain Tank:** Sill in the process of the design that Bryant High School is doing. There are 7 classes and 210 students total participating in it and we are hoping to have the bid on the tank done by April.

Lift Station 5: Design proceeding and getting close to the design being finished, the new design is maintenance friendly and will provide a better situation for when it floods. We had some issues recently with the old station as far as the pumps not working and we have found a temporarily solution until the design is finished for the new pumps.

Lift Station 40: LS 40 has experienced a lot of pump problems. Some of it is from construction debris getting into it and tearing up pumps. It can happen sometimes when they're building around open sewer manholes. We are planning on changing out the system and adding scada system which will allow for better communication and technology.

Saline Regional : No update but we have the easement and it has been discussed.

Pilot Station : Timmy is involved with the stuff going on at LS 5 & 25 and has put a hold on that due to the pumps going out on LS 5.

Reports : **WWTP Expansion :** Have scheduled a meeting in May for this at WWTP plant in the conference room.

Director Report - Presented by Ted Taylor

Ajournments : Motion to Approve Leak Adjustments:
Motion Seconded:

**David Hannah
Wade Boone**
