**Rate Presentation/Rate Discussion:** Wildan presented via zoom on the rise of utility rates. Rate adjustments are due to inflation, necessary Capital Improvement Plans, wholesale costs, and other indirect expenses. Rate comparisons were done with similar surrounding cities of different meter sizes and infrastructure fees. Average monthly charges to the customer were compared. The number of Bryant customers, residential and non-residential, in water and wastewater were shown and forecasted the number it will grow to over the next 5 years. Factors were discussed as to how to fund increasing costs of rates were identified, in mid-term and long-term planning. Rate proposals presented over the next 5 years along with the impact of the changes. Benefits of the proposed rate plans were discussed, enabling the City to fully fund all water and wastewater costs and CIP over the next 5 years. Also, enables the City to operate self-sufficiently, and provide safe drinking water.
