A: Harpers Handcrafted Monument Sign (replacement)

This sign will replace the old sign for the church, using the existing brick base. The illustration is a representation of the final product, but may vary slightly in color or size (only to fit the existing structure). This was drafted using AI, and the final product may not be exact but as close to this as possible.

Existing sign location:
NE corner of property

B: Harpers Handcrafted Façade - Front Eave

This sign will be attached at the front eave using either painted wood or powder coated metal.

C: Harpers Handcrafted Façade - East Side of Building

This logo will be part of a larger painted mural. The logo will be at this size; however, the specifics of the mural and what is portrayed around the logo will be up to the artist.

This is an AI generated mock up of the full mural to show how logo will be used, for reference. Again, the full, final design will be determined by the artist.
