RE: Site Plan – Reynolds Centre Commercial Expansion, Bryant, Arkansas

Dear Mr. Smith:

We have attached 12 copies of the site plan and proposed elevations for the new building in the Reynolds Centre development. We have also attached 2 full sets of civil design plans and the storm water pollution prevention plan. As you know this is the last building of a larger development. Our client plans to use much of the existing site as is and disturb as little as necessary.

The landscape area for this building is relatively small and confined to parking islands and the southern border of the proposed building in this undeveloped section.

Most utilities already existing for the proposed area, but a sewer extension is planned to the existing sewer line on the West side of the property. The site is graded for surface stormwater flow. Since all site conditions are existing there is no additional detention planned.

Please feel free to call me if you have any questions.

Sincerely,

Tommy Bond P.E.

ADA/ABA ACCESSIBILITY STANDARDS

The *Americans with Disability Act* and *Architectural Barriers Act* Accessibility Guidelines were prepared by the U.S. Access Board and mandated by the U. S. Department of Justice regulations implementing Title III as the official ADA/ABA accessibility guidelines. **All new construction, remodeling, and modifications must conform to these building standards** for places of public accommodation and commercial facilities. Residential is exempt.

The ADA/ABA accessibility guidelines contain general design standards for building and site elements, such as accessible entrances and routes, ramps, parking spaces, stairs, elevators, restrooms, signage, etc. Also included are specific standards for restaurants, medical care facilities, libraries and transportation facilities and vehicles, and places of lodging.

The guidelines also include "scoping" requirements that outline the necessary features or appropriate quantity for achieving ready access. For example, at least 50 percent of all public entrances to buildings must be accessible with an accessible path of travel. In public restrooms, at least one bathroom stall must be accessible unless there are more than six stalls, in which case the number increases.

I hereby certify that I have read and examined the above notice and will comply with all guidelines of the ADA Accessibility Guidelines. I further understand that a copy of the ADA/ABA Regulations are available for inspection during business hours of City Hall or I may obtain a copy by writing:
